Logging a job:

If you would like to log a job online, you can by going to our web page and click on contact us, in your message tell us your name, address and telephone number, the fault description of your laptop/desktop or server. We will then create a job sheet for you then email you the job sheet. If you can then drop off your machine with a copy of the job sheet we would greatly appreciate it. We will then contact you either by phone or email with our diagnosis. If you can't do this then just call us. We look forward to helping you.
